WIRE MESH CARE AND MAINTENANCE

- **annually check the tightness of screws and bolts for all door hardware on wire mesh gates and sliding doors;**
- **annually lubricate door locks, closers arms, exit devices with a light oil;**
- **occasional wipe down with cloth dampened in mineral spirits should be sufficient to remove grease and other undesired markings from wire mesh material;**
- **dents and bends in body of wire mesh and/or framing members which are too extensive to be reshaped on site by facility maintenance personnel may need to be replaced.**
